People with Purpose, Powering Change

POSITION: **PRACTITIONER**

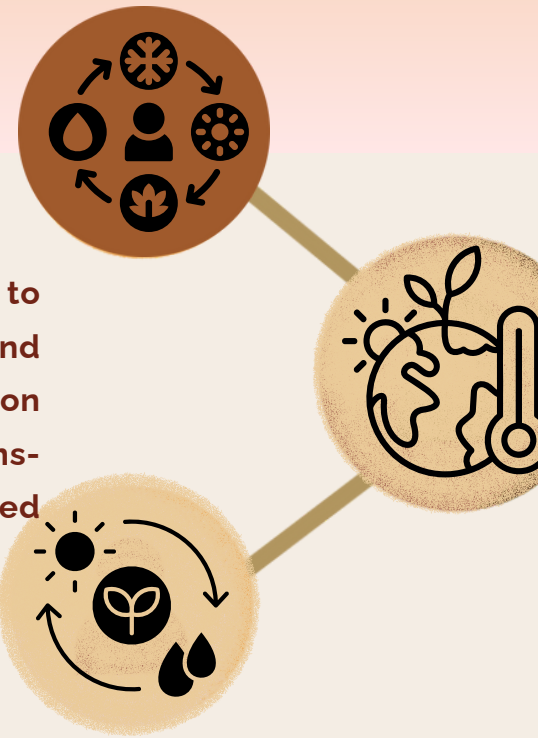

Theme: **Climate Action**
Location: **New Delhi**
Joining Date: **Immediate**

About the Role

We are looking for a passionate and experienced Practitioner to lead the implementation of the initiative Restoring Land and Prosperity for People, Nature, and Climate. The role focuses on enabling climate-resilient rural development through systems-level integration of schemes like MGNREGS, farm-based livelihoods, and climate-adaptive protocols.

Responsibilities

- Analysis of financial outlay detailing the requirements of credit, grants and investment as well as an analysis of existing schemes that can be leveraged.
- Development of innovative financing mechanisms and scoping of financing opportunities to fill the gaps identified through the preceding analysis
- Support with identification and prioritization of key barriers in restoration through robust methodological approach that includes policy review, consultations, key person interviews, and co-organizing Restoration Dialogues with key stakeholders
- Work closely with stakeholders for monitoring, reporting, and verification for all the above activities. Support in grant reporting and other project management activities as required by the donor.

- To facilitate convergence of public funds for landscape restoration implementation like MGNREGS, watershed programs and livelihoods mission
- Co-organize restoration dialogues with participation of key experts and government stakeholders resulting in discussion and recognition of agroforestry as a critical intervention for landscape restoration and more synergistic convergence of public funds like MGNREGS for landscape restoration
- Support TRI's nudge units with engagement protocols with the departments and key functionaries to discuss and take forward restoration dialogues for overcoming policy barriers.
- Work closely with the Rural Development Department, ensure timely issue of relevant guidelines, office orders, design special schemes to support the climate restoration work through nature-based solutions in their districts

Knowledge/Skills

- Strong understanding of government structures and processes, with the ability to facilitate timely approvals and communications
- Experience in managing and delivering mitigation and restoration projects
- Capability to build and maintain networks across institutions and organizations, particularly in Central India
- Multi-lingual with experience working in diverse cultural contexts
- Sound knowledge of carbon sequestration science and carbon markets

Qualifications & Experiences

- Post-graduate degree in a field related to forestry, natural resource management, ecology or another related field of study with 7 or more years of experience relevant to this position
- Experience with the management of large projects in the conservation/forestry/natural resource management sector
- Experience understanding of topics related to forests, conservation and people in Central India
- Experience understanding of the principles and practice of integrated landscape approaches to restoration (i.e., both within and outside forests)
- Good communication skills, both verbal and writing skills is required

How to Apply

If you are a development professional passionate about climate action and public systems, we would love to hear from you. TRI matches compensation competitively in the sector to draw the best talent. To apply, kindly visit <https://www.trif.in/careers/>. The deadline for submission of the application is 31 July 2025. Since selection decisions will be made on a rolling basis, interested candidates are encouraged to apply at the earliest. Only shortlisted candidates will be contacted and invited for the next steps.

Join us in restoring landscapes and driving climate action!
